

January 23, 2014

Dear Representative Mosby,

We are writing to ask that you support the bill that will require stores in Baltimore City to charge a fee for each disposable bag. Similar laws in Washington, DC, and Montgomery County, Maryland, have reduced disposable bag use by 50 to even 70% in some stores, leaving streets and waterways cleaner while saving businesses money. These programs are extremely popular among both residents and businesses.

The negative effect of plastic bags on wildlife and in the eco-system is a big concern for us and our families. We are also saddened by seeing plastic bags as trash scattered throughout the neighborhood. It is our hope that this bill will help play a role in solving this problem.

Sincerely,

The Class of 2014
